

Sinclair Broadcasting's blatant attempts to influence the political climate in this country should not be allowed!

The broadcast airwaves belong to the public! Your job is to see that those who use the airwaves do not abuse that public. Exercising iron-fisted control over what is seen or not seen in large areas of the country is an abuse of that public trust. Your job, should be to stop such abuse.

Yesterday, Chairman Powell was quoted as saying that "there was no precedent" for taking action in the Sinclair situation. That logic is preposterous. If all those people who set precedents throughout history had taken that position - NOTHING WOULD EVER HAVE CHANGED!
